

## Understanding Arizona's College and Career Ready Standards (AZCCRS)

Using the Arizona College and Career Ready Standards as a guide, we came up with Summer Reading gameboard tracker questions and activities to help students improve their reading and writing skills. You'll see codes on the gameboard tracker that look like this:

For Example **4.RL.2**

**4**

This number represents the grade level at which the standard has been written. In this example, the standard has been written for a fourth grade skill level.

**RL**

These letters represent the subject area for the standard. In this example, the subject covers Reading Standards for Literature, or RL.

**2**

This number represents a specific area within the subject. In this example, the "2" stands for Key Ideas and Details and focuses on determining the theme of a story in Reading Standards for Literature.

Because the AZCCR Standards build on previous skills to increase complexity from kindergarten through the fifth grade, the questions and activities on the tracker are mostly aligned with AZCCR Standards from the 4th and 5th grade. However, they can be adapted for younger learners.
